

Dear Cattlemen,

It is with a great deal of pride that we continue the heritage of raising good black Angus cattle started by my grandfather, Frank Josephson, over 100 years ago. He homesteaded near Washburn, ND in 1902 and bought his first Angus bull in 1914. Registered Angus bulls have been used ever since. The quality runs deep in our established cow families in the Josephson herd. I always look forward to each year's calf crop and have seen the buzz and excitement generated by this year's set of yearling and two-year-old bulls.

Visitors to the pasture this past summer have commented on the quality, uniformity and outstanding EPD's found in this year's offering. We have a good set of bulls in each sire group, starting with Barstow Cash sons and including bulls by SAV Resource, SAV Priority, Koupals B&B Identity, AAR Ten X, PA Power Tool, PA Safeguard, SAV Final Answer, RB Resolute and Josephson Hoover Dam J114.

This year we are featuring an outstanding set of yearling and two-year-old bulls for sale on **April 14, 2016, at Kist Livestock, Mandan, ND.** Come and see these top herd sire prospects! You can stop by anytime at Rost Farms, Ivanhoe, MN, to view the bulls. There should be bulls in everyone's price range and you can buy with confidence from a program you can trust.

Regards,
Kirby Josephson

Bulls Sell April 14th!

We have an outstanding set of yearling bulls for sale this year. They feature calving ease genetics, combined with breed leading growth, carcass, maternal traits, and docility.

We're also featuring stout, high quality 2-year-old bulls for your selection. This is a very quiet mannered set of bulls.

Our bulls are developed with a high roughage ration to ensure soundness of feet and legs.

The strength of our cowherd runs deep with years of intensive selection for sound, maternally strong, problem free cattle. Years of performance testing and AI breeding to top high accuracy sires of the breed continue to move our program forward.

To give you the most predictable genetics available, we have GeneSeek GGPLD tested all of the Josephson Angus bulls in the offering. By going through the extra time and expense of DNA testing, we can offer you the same information on a yearling bull that you would have on a bull that has already sired his first calf crop. With high accuracy EPD's you can buy these bulls with confidence!
