

Dear Cattlemen,

It is with a great deal of pride that we continue the heritage of raising good black Angus cattle started by my parents in North Dakota over 60 years ago. I always look forward to each year's calf crop and have seen the buzz and excitement generated by this year's set of yearling and two-year-old bulls. Quality runs deep in a number of established cow families in the Josephson herd and, when mated to a lineup of high performance sires, produced an outstanding calf crop.

Visitors to the pasture this past summer have commented on the quality, uniformity and outstanding EPD's found in this year's offering. This year we have a good set of bulls in each sire group, starting with Connealy Earnan sons and including bulls by Sitz Upward, Hoover Dam, Connealy Final Product, EXAR Upshot, EXAR Counsel, PA Safeguard, SAV Final Answer and SAV Pioneer.

This year we are featuring an outstanding set of yearling and two-year-old bulls for sale on **April 9, 2015, at Kist Livestock, Mandan, ND.** Come and see these top herd sire prospects! You can stop by anytime at Rost Farms, Ivanhoe, MN, to view the bulls. There should be bulls in everyone's price range and you can buy with confidence from a program you can trust.

Regards,

Kirby Josephson

Bulls Sell April 9th!

Josephson Imprint J216

Top selling 2-year-old in last year's sale. A maternal brother and other good bulls like him sell April 9th!

We have a strong set of big, stout 2-year-old bulls for sale this year. This son of Connealy Impression is full of red meat and combines breed-leading calving ease with growth, docility, and is a structurally sound bull.

Our yearling bulls this year feature calving ease genetics, combined with breed leading growth, carcass, maternal traits, and docility. This is a very quiet mannered set of bulls.

Our bulls are developed with a high roughage ration to ensure soundness of feet and legs.

Again this year we feature DNA testing. All Josephson Angus bulls have up-to-date EPDs enhanced by GGP HD 80K DNA tests. This greatly improves the predictability and accuracy of the EPDs for the bulls you're selecting. You can buy with confidence!
